### Daily Form

Fill out every day, even on PMs, and projects

**TECH NAME** Caleb McNany

**DATE** 6/12/24

**POINT OF CONTACT:** Scott

**DESCRIPTION OF WORK PERFORMED** Arrived on site for a no cooling call on ACCU-1. I found circuit 2 to be cycling on high discharge pressure due to the condenser fans not coming on, the low ambient fan with the damper had broken off a fan blades and snapped the bracket that holds the motor in 2 places the vibration also caused one of the wires to rub through causing a short and blowing a fuse. I disconnected the control wiring for the fan and replaced the fuse. Circuit 2 is running at this time but will need the entire fan assembly replaced. Circuit 1 I found to be low on refrigerant. I added 9 lbs of r438a but still need more, the circuit is constantly running the hot gas bypass to bring up the suction pressure. I also found a bad contactor and auxiliary contactor bad for one of the condenser fans and a bad fan cycle switch for another one of the condenser fans, both will need to be replaced. I disabled circuit 1 from coming on for now until we can get back to replace the parts and add additional charge to the system. Circuit 2 is running for now so they will have some cooling.

**TOOLS USED** hand tools  
multi meter  
gauge manifold  
scale

**MATERIALS USED OR PICTURE OF TAG\*** (9) lbs of r438a (provided by customer)  
(1) 15 amp fuse (from van)

**HOURS** REGULAR: 8

OVERTIME:

**CERTIFICATION OF WORK**

To be signed by the Contractor:

Print Name: Caleb McNany Date: 6/12/24

Signed: 

To be signed by Facility Manager:

By signing the Certification of Work, I certify that the above-named individuals representing the Contractor arrived on site and to the best of my knowledge, completed the stated work listed. This is **NOT** a Certification that the Work was performed correctly – The COW simply verifies that that someone representing the Contractor was onsite and accomplished something
