## WORK PERFORMED

Date	Description
12/17/2024	Shut down fan coil power and lock out. Replace starter disconnect switch. Turn on power and test operation. Unit working ok.
12/18/2024	Shut down power in ERV1. Open unit and remove cells and filters. Pull bolts and drop the top motor. Remove electric. Pull bolts and remove motor. Remove sheave and mount on new motor. Pick up longer bolts because new motor is cast iron and existing bolts aren't long enough. Mount new motor to bottom plate and align. Install electric and check rotation. Put belt back on and tighten locking bolts. Remove top motor electric and mounting bolts. Remove motor and sheave. Install new motor and new sheave. Reinstall electric and check rotation. Reinstall locking bolts and belt. Put cells and filters back in unit. Turn unit back on.
12/19/2024	Shut down power in ERV2. Open unit and remove cells and filters. Pull bolts and remove the top motor. Remove electric. Remove sheave. Mount new motor and Install electric. Check rotation. Remove top motor electric and mounting bolts. Remove motor and sheave. Install new motor and check rotation. Existing sheaves do not fit due to new motors are a different frame size. Pick up new sheaves and install. Reinstall locking bolts and belts. Put cells and filters back in unit. Turn unit back on.
12/20/2024	Shut down power in ERV3. Open unit and remove cells and filters. Pull bolts and remove the top motor. Remove electric. Remove sheave. Mount new motor and Install electric. Check rotation. Remove top motor electric and mounting bolts. Remove motor and sheave. Install new motor and check rotation. Existing sheaves do not fit due to new motors are a different frame size. Install new sheaves. Reinstall locking bolts and belts. Put cells and filters back in unit. Turn unit back on.
