Description of Repairs

when I got onto the roof I found the stack was rotted in several places, I removed the section of Stack that was leaning and a safety hazard and I temporarily mounted the cap on the pipe below to keep weather from getting inside the boiler there are four pieces of Stack that need to be replaced and the boot around the pipe on the roof was damaged and needs to be replaced. I also noticed.....
when the stack fell over it damaged the intake pipe cap so that cap needs to be replaced too I will submit a quote for repairs
