**Description of Repairs**

I found the hot water circulating pumps running even though the  
computer was calling for them too run. I switch the controls to bypass  
and could get the pumps to run in manual control.  
this is a continuing problem with the EMS system that needs to be  
upgraded and we are still waiting on approval for this process.  
I'm referring to CSS 12250. So we will have to operate in bypass  
mode until controls are upgraded and maintained.
