Maximo Work Order No.: 8839

Asset #: 1876

Date Issued: 09/10/19

Original Description: One of the A/C units is low on refrigerant and needs to be leak tested & serviced

Repairs Needed:

S&S proposes to come out to remove and replace the AC indoor and outdoor unit in Zone 2. S&S will then charge the system with refrigerant and check all system functions to ensure working properly. To make this unit 5-star energy rated you must use a conventional air handler and outdoor unit. The space pak a high velocity air handler is specifically designed per application. The conventional air handler cannot support the buildings space pak duct work. This makes changing systems to five start energy not cost effective for a minimal energy savings.
