Original Description: Gate inoperable. The gate sensing loops were repaired however it appears the operator, chain, and chain gaurd need replaced. Need to investigate and do what is needed to get the gate operational

Repairs Needed:

Will mend existing gate by welding, bolting steel supports and hardware onto existing frame of gate to allow it to move freely when opened and closed. Will remove electric as this is impeding gate to be manually opened and closed. SS will provide locking asdsembly (Heavy chain and lock)
