Description of Repairs	Labor and materials to replace door and hinges with new.								
Diagnosis: Initial Work Order	New door needs to be installed. There is an exterior door on the side of the BMA shop that has come disconnected from the hinges. It appears that this was an issue in the past and instead of proper repairs, it looks like the door was glued back to the frame. Need to have the glue residue cleaned up to allow for a new door to be properly installed. Currently there are some items being stored in the space, but these do not require the door to be secured, plus it is within the MEP fence line.
