**Location:** DE002

**CSS #:** 24797

**Maximo Work Order No.:** 12165

**Asset #:** 1705/1706

**Date Issued:** 04/23/20

**Original Description:** Received a call from Mr. Handel that there was water coming from the mechanical room doors. When he went inside he found that one of the boilers had a slow leak and it was in alarm mode. I was at the center the next morning hoping to allow the other boiler to run, but it is not running at all (fans have power, but control panel is not operational). I powered down the boiler in alarm and shut off the water feed to the unit. I have included some pictures of the leak as well. At this time, there is no heat and no hot water in the building. Need to have the units troubleshoot and repaired.

**Repairs Needed:**

SS Mechanical Proposes to remove and replace parts listed in the quote on the Weil-McLain Boiler. Will then complete a system check to ensure the system is working properly.
