| Description of Repairs | The sewer was backing up out of the floor drains when the showers, sinks or toilets were used. Had to goto the shop to pick up the 1500 machine and then headed to location. Once onsite I brought the equipment into the electrical room to snake from the floor cleanout in that room. Hit a clog around 60ft and 100ft in the sewer. Made multiple passes in the sewer to make sure there were no more clogs. Ran the showers, sinks and ran a hose in the floor cleanout for over 30 minutes while cleaning up and loading up. Ken found a clogged toilet in the women's room when he was shutting off faucets. Grabbed the toilet auger and unclogged the toilet in the women's room. Mopped floor and cleaned up any mess that was made from snaking the sewers. Work complete. | | | |
