Description of Repairs	S&S will shut the water off the chemical fill tank, will cut two tees to the water supply line and run a ¾ line to connect the filter housing with isolation valves on each side. S&S will add a ball valve on the existing supply line that will now be a bypass line and normally closed while the new filter line supply the tank. S&S will then turn the water back on to system and test all new piping.						
Diagnosis: Initial Work Order	(1 housing)- Filters that will need separate ¾" piping and bracing run to install the housings (discharge and suction taps will need to be located or installed)--- with ¾" shut off valves to isolate filter so service can be performed
