

**Region: 5**

**Location: MD002**

**CSS #: 35141**

**Maximo Work Order No.: 16897**

**Asset #:**

**Date Issued: 3/31/22**

**Original Description: Repair to the two wall 8" pipe protrusions, repair caps, and re-seal from leaks. Bldg 0314.**

**Repairs Needed:**

S&S proposes to creat passage ways to covertly run comm cabling into an interior space. Core drill two holes through the block into interior space, through a framed finished wall. Seal and secure piping which will be 8" PVC #40 with caps on ends to prevent passage by rodents and or debris.

**RS Means Line Buildup and Labor Summary (Data Version 2017, Q4):**

### DETAILS

Polyvinyl chloride (PVC) is one of the most broadly used thermoplastic materials, common to many industries. PVC is highly resistant to acids, alkalis, alcohols, and many other corrosive materials. The wide range of joining options that include solvent welding, threaded and mechanical connections make it ideal for easy, error
