| DESCRIPTION OF WORK PERFORMED | Boiler member 1 failed its inspection due to a faulty flue switch. I test fired both boilers in low and high fire rates and they were both running fine. Pulled the wire off of the flue switch to check and make sure both boilers would shut down due to flue issues. and they both did after about 60 seconds. I tested both boilers like that multiple times and they both locked out. Boilers are running properly at this time. |
