TECH NAME	Jacob Deep
DATE	11/2/23
POINT OF CONTACT:	Cindy
DESCRIPTION OF WORK PERFORMED	<p>upon arrival both boilers were on and were modulating per the controls.</p> <p>B1 was tripped out on flame failure since we're still waiting for the new flame sensor quote to be approved</p> <p>B2 tripped out on a hardware fault.</p> <p>I checked over the main controller and all the wiring, which all looked good.</p> <p>its possible it was a power issue since they lost power yesterday.</p> <p>per Weil-McLain if this issue keeps on happening the controller should be replaced.</p> <p>I noticed one of the AO smiths were tripped out, Cindy said one of the pm's were coming to look at it.</p>
TOOLS USED	handtools
MATERIALS USED OR PICTURE OF TAG*	the flame sensor has been quoted since the last visit
HOURS	REGULAR: 2.5 hrs

TECH NAME	Tom Timlin
DATE	11/6/23
POINT OF CONTACT:	Scott
DESCRIPTION OF WORK PERFORMED	Switched the flame sensors in the boilers to put the bad sensor in the unit which we are assuming has a bad control board in. Reset the boilers and they both came on and ran fine for the 4 hours I was onsite. Scott was having heating issues to the air handlers. Found the mounting plates for the actuators broken and letting the whole actuator move around. And the actuators in the big air handler make up/return air were not working. Need to order and return with 2 new actuators for the air handler and the mounting plates for the 3 way valves.
TOOLS USED	hand tools
