☐ Leak Repaired

Method: _____

Total Charge: _____

WORK PERFORMED/UNIT INFO.

Arrived on site, checked in with customer. Changed out Outdoor Air Damper actuator on AHU 4. Ensured it operated by driving mixed air dampers open and closed. Investigated AHU 2 actuator and found it to be operating correctly. Checked AHU 6 OAD actuator and found the linkages were loose. Tightened those and ensured they operated. Chiller is now going out on alarm of Suction Temperature High on circuit 2. Sensor is reading 100 degrees with circuit 2 off. Can not get techview to work to hook up to chiller. will return to complete exhaust fan motor.
