| Description of Repairs | S&S dispatched a plumber on 7/22, where we found a floor drain overflowing. We snaked until the line was clear and the water went back down. On 7/25 CMI called back letting us know there was some new water on the floor possibly coming from behind the wall. After further investigation, making an access panel, we found 2 spot that are leaking. S&S will replace the angle valve behind the woman's left sink. Also, replace the leaking Fernco coming from a sink drain and then install an access panel on the wall. | | | | | | | | |
