Diagnosis: Initial Work Order	Found a water damaged ceiling tile in room 219. Removed damaged tile and found a number of previous tiles pushed to the sides. Pulled all of them down. At the time, I could see no evidence of water leaking from pipes or roof. Left tiles out and asked Mr. Parrish to keep an eye on the area if it rained. During next site visit it was raining and there is a roof leak in the area above. Leak needs to be patched to prevent further damage and ceiling tiles replaced with new ones.
