<b>MD021 – Compressor not working in OMS Bldg.</b>	<b>CSS #28384 WO# 13454</b>								
Description of Repairs	S&S was onsite and reset contactors and the compressor came on. Once compressor was running we were able to find a leaking ball valve. This leak is causing the compressor to overrun and trip the contactors.  S&S proposes to remove and replace the leaking ball valve. S&S will then complete a system check to ensure the compressor is running properly.
