Fault Code	Other fault	
Risk	Safety Risk	
Recommendation	Repair	
Comment:	<p>Upon troubleshooting a electrical short was discovered in the hoist up motion ckt Pendant cable was compromised and compromised section was removed However it is to be noted pendant cable wiring is old and has twist in The cord grip in the pendant is broken and a rudimentary repair was made to put crane into service for client The repair does not compromise safety however forward looking reliability cannot be guaranteed for client It is my recommendation that a new cable and pendant be installed as a proactive measure Strain relief was repaired in addition to the wiring All functions tested including hoist limits Crane returned to service</p>

Findings and Actions

Safety Risk **WARNING**

Indicates an unsafe condition. Failure to remedy such condition before continued operation of the identified Asset may result in personal injury including death, or property damage.

Production Risk

Indicates an inefficient condition. Failure to remedy such condition before continued operation of the identified asset may result in inefficient asset performance or an interruption in production.

Undetermined Condition

Indicates that the condition could not be directly verified through visual inspection as a result of asset configuration and/or obstruction.

The condition of certain components cannot be directly verified through visual inspection without further disassembly and/or the use of other inspection methods. These advanced services are generally excluded from the scope of typical compliance and preventive maintenance inspections. Consultation Services may be added to a Service Program or offered on a stand-alone basis to assess the condition of these components. Inspection frequency for these components should follow OEM recommendations and/or governing regulations. If no records are available, we recommend appropriate inspections be carried out to determine current condition and to establish a baseline for recurring inspections.

Improvement Opportunity

Indicates a potential opportunity to improve the safety, productivity, application or useful life of the asset.

Acceptable / Repaired Item

Component condition is verified by Konecranes service technician. No actions required. If a component or other object has been repaired within the service visit, green color code is shown as well.
