RE: U.S. ARMY

FORT TOTTEN

BAYSIDE, NY

To whom it may concern:

I visually inspected the following boilers in compliance with NYC Local Law 62/91, New York State Sec 204 of NYS Labor Law and The National Fuel Code. The boilers and the boiler rooms were visually inspected to be code compliant and condition evaluated. This inspection did not include any performance testing.

BUILDING 200

4 Boilers ...2-ATH (Advance Thermal Hydronics) Model # KN series 16

2-KN series 2

All boilers code compliant, boiler room code compliant

Condition Good.

BUILDING 118

2 Boilers...2 ATH (Advance Thermal Hydronics) Model KN2

All boilers code compliant

Boiler room has a violation. There is an electrical box that requires to be covered.

Recommend moving "Z" exhaust 6-inch diameter vent down appx. 2 feet down away from the electrical box.

Condition Good
