| <p>Room temperature in electrical room at 80 degrees. Found out that the indoor fan was not running. Applied power to the fan individually and ran test on the fan motor, and came to the conclusion that the fan motor failed. In order to restore cooling to the room the fan motor must be replaced. . The fan motor will be replaced like for like using the OEM parts from the manufacturer Vertiv.</p> |  |        |   |                        |  |                 |  |
