DESCRIPTION: Test Ports

SCOPE OF WORK: We were asked to check your Backflow Preventer (Conbraco Model # UT603, Serial # 40218T2). Our technician noted that the failure found during the inspection was due to leaking ports. He is recommending that the ports be replaced. The backflow preventer is in good shape otherwise and does not appear to have any other issues. The pricing shown below covers labor and materials required to do this work. The diagnostic call is being invoiced separately. Please call me at extension #236 if you have any questions. Thank you.
