**Add an inline filter like you did at MDO13 last year . So the boiler condensate is filtered before it goes to the floor**  
**Problem: condensing boiler creates acidic waste after the condensing process is complete. This waste must be neutralized before being sent to sanitary sewer (plumbing Code).**

S & S proposes to furnish and install the following:

S & S will install one neutralization kit which will supply drains to Boiler # 1.

S & S will install the second neutralization kit to supply drains to Boilers #2 and #3.

S & S will pipe the drain lines for both Boilers #2 and #3 together.

S & S will then complete a system check to ensure everything is working properly.
