CSS Ticket Number: 2452

Problem: BF failed testing.

S&S was onsite and diagnosed the 2" backflow serial # RPZE has two damaged and corroded test port.

S&S was onsite and diagnosed the 1" backflow serial # G7985 needed to be replaced.

S&S will do a full replacement on both backflows.

S&S will then preform a test on the device to ensure it is working properly.

S&S also found a third backflow that needs replacement but all parts are obsolete and we will need to check the dimensions to find parts that are compatible. S&S will do this while onsite preforming the above work.
