**Site Contact:**  
**Salesperson:** Lindsay Ruby  
**Created Date:** 04/27/2021  
**Valid For:** 30 Day(s)**WO#: 13950****CSS Ticket Number: 25532****Problem:** Repair to slope of tile floor in male latrine, 1st floor bldg 002, to allow for proper drainage of shower water, or another fix that will resolve drainage issue.

S&S proposes to elevate areas directly outside showers (changing area) that will allow water that exits shower pan to flow back to the drains. S&S will form and pour concrete mix at approx 1/8" per ft slope from edge back to existing pan, thickness to be approx 4.5" from front edge down to 4" at existing shower pan curb. Once concrete is cured we will apply a primer then a two part non-skid epoxy coating (beige color) to make for a water proof, safe surface.

Men's Shower Room = 9 showers

Women's Shower Room = 4 showers

**\*Handicap showers do not need to be done****Service**
