Problem: The hot water booster pump at VA002. Turning on and off about every 3 minutes, very hot, and rattling noise.

Asset # 2226HWTP#01

POC Evan Usner 318-787-1920

Troubleshoot B&G hot water booster pump. Tried greasing, cleaning and repositioning internal parts with no success. The pump appears to be stalling out immediately after activation. S&S will remove and replace the booster pump and then complete a system check to ensure everything is working properly.

**Pump is in stock*
