TECH NAME Tom Timlin

DATE 2/22/23

TOOLS USED hand tools

MATERIALS USED 1: CM-6 CO2 sensor

DESCRIPTION OF WORK PERFORMED Installed the New CO2 sensor in bay 1 of the garage. Wired it in so it got power from the local transformer. The new sensors will not connect to the old control system. But the new sensor has a buzzer built into it and will alarm them locally. I recommend having a control company come in and see if they can get into the old controller and reprogram the system to accept the sensor. Sensor is working properly at this time.
