*\*2/5 Replaced glycol Feed controller on heating system. Cleaned and refilled tank w/a 40% mix of glycol. Replaced pressure transducer. Set control for 20 psi. C.I. and 27 psi. C.O. I removed the handles on the domestic water valves since someone diluted the system with water even though I wrote on the valves that they are normally of F. I pumped in 50 gallons of pure glycol to strengthen the mixture in the Hot Water system.*

DESCRIPTION OF WORK PERFORMED

Installed controller. Set to 20 C.I and 40 C.O.

When I opened the valve to the system, the pressure relief valve started flowing glycol from the system to the tank. I was unable to adjust it and stop the dripping. The pressure relief valve must be replaced.
