### Service Requested

CSS 21615 WO 11076 VA049 - Replace the inoperable suspended unit heaters in OMS building with new. This building use to run off propane, it has since been switched over to Natural Gas and needs new unit heaters installed. Also, where the Natural gas enters the building we would like a regulator installed and also a shut off valve. As the system currently sits, there is no shut off at the building and the regulator is located inside and should be located outside the building.

12/12/19 es- Emailed Mike to check on status of this. Emailed customer to let them know i was working on it.

12.30.19 RL CO quote finally submitted with incurred.
