WORK PERFORMED/UNIT INFO

Called too confirm access to the building. Arrived on site, checked in with customer. Got into the building then went to the mechanical room and unlocked the door then pulled the van around back. Started looking for the parts that are supposed to be installed on the boiler, I could not find them so I called the customer to check. He informed me that his guy had them on his truck and will drop them off when he comes back to Charleston. Started taking the boiler apart while waiting on the parts. Removed the old one and started checking other parts of the boiler while waiting. The part arrived and started installing the new one ran the wires and secured everything back in place. Put the boiler back together and double checked everything. Started to
