Vector Industries FA-1000AL-TC Chemical By-pass Feeder

The Vector FA-1000AL-TC chemical by-pass feeder is used to introduce chemicals into closed system recirculation loops used for water treatment applications like chill water recirculation loops, hot water circulating systems, cooling tower chemical feeders and water treatment systems alike. The purpose for this chemical feeder is make adding chemicals to a

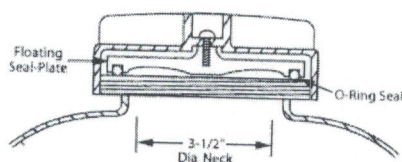

water treatment system easy. The Vector chemical shot feeders are constructed of the highest quality steel and are epoxy coated to ensure a very long life. This feeder has a unique buttress threaded cap allowing it to achieve a 300 PSI rating which is the highest pressure rating found in in chemical by-pass feeders on the market today.

Ratings

- Pressure: 300 PSI (20.7 BAR)
- Temperature: 200 F (93 C)

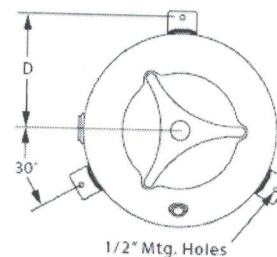

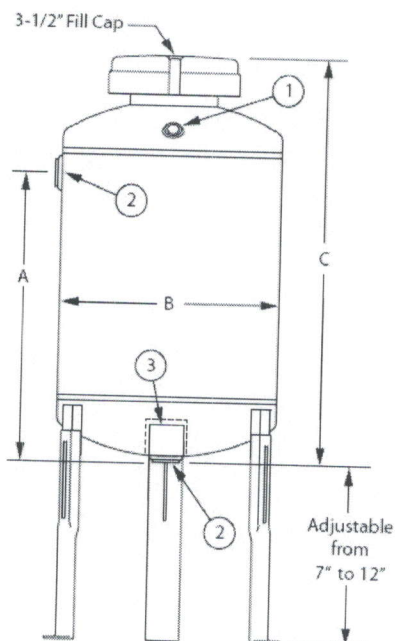

Features:

- Buttress Threaded Cap
- Epoxy Coated
- Adjustable Leg Set Included
- Optional Filter Conversion Kit Available

Cross dissection of the 1/4 buttress threaded cap assembly with self alining floating seal plate between the neck of feeder and cap.
