| Molybdate (ppm as Mo) | 60 50 - 200 | | | |

Evaporative Condenser

Online 

System is down.

Closed Loop

Online 

Conductivity is elevated due to the presence of Glycol as well as Molybdenum, nothing to be concerned with. I met with the engineer Richard Walker on site and he showed me where the boiler was leaking. Richard is on top of it and is working on getting the system fixed. I will return the middle of February, if the leak is fixed before then please let me know and I will try to make my visit earlier in the month to chemically treat the system.
