

Date: 4-13-26

Region: 4C
FAC ID: VA012

FEMS/CSS No.: 3190098
Maximo WO No.: 21690

Asset #:

Priority: 2

Original Work Request:

Install automatic blowoff. Currently the drain on the compressor tank is located on the bottom of the tank and hard to reach. Automatic blowoff is on a timer and automatically drains moisture from the tank. Currently moisture builds up in the tank and bleeds over to the air system, allowing moisture to bleed into air supply system which can damage tools and equipment.

Description of Repairs Needed:

Proposal is for the increase in costs since submission of the original proposal in September of 2025 to replace the automatic blowoff valve. This proposal is only for those items increasing in cost from the original proposal.
