DESCRIPTION OF EQUIPMENT:

Sink Drains

DESCRIPTION OF REPAIRS:

Moore's is proposing to cut into the wall located in the men's restrooms where back to back sinks are clogged. Will remove tile and open up wall to gain access to the pipe in wall. Will cut out a 20" x 20" hole to allow access and working space. Will cut out a section of the clogged pipe, install a tee wye, cut out section and cleanout. This will make it so the drain can be snaked in the future, should any issues arise. Once the pipe is cut and tee installed, will snake drain and clear out sinks so that they are able to drain. Will then ensure proper operation.

**Please note: This is not guaranteed to permanently solve the issue, but this will need to be done in order to further diagnose issue at the least. **
