**DESCRIPTION OF EQUIPMENT:**

HW-2 BOILER  
LOCHINVAR MODEL AWN151PM,  
S/N AI3H20046146

**DESCRIPTION OF PROBLEM:**

While onsite performing the boiler inspection, the inspector found the flow switch stuck in the ON' position. After inspector freed it up the switch would not make when the pump came on. Inspector left this hot water boiler off for safety purposes. Recommend replacing the flow switch to ensure proper operation of the system.

**DESCRIPTION OF REPAIRS:**

Remove and install the new flow switch. Make all the necessary connections. Start, test, and ensure proper operation of the system.

9/5/19

Upon arrival I was unable to gain entrance. Called several numbers and left a message, notified CSR. Finally gained access and was escorted by Roundtree to the Mech. Rm and I set up at WH-2. Isolated the heater and removed/replaced the failed flow switch. Opened valves and to the water storage tank and energized the heater to check operation. It failed on a combination safety identified as 'Flow Switch/LWCO'. Checked the flow switch and it is made. Checked the vent on the water heater and it is full of water with no air. LWCO sensor has failed. Will submit a proposal to replace. THIS W.O. IS COMPLETE.

For questions regarding commercial invoices please contact our Accounts Receivables Department at 434-309-2581. Past 30 Days invoices are subject to 1.5% monthly interest charge. Additional charges for payments made by credit card may apply. We accept VISA, Master Card, Discover and American Express. Late payments sent to collections or legal process will also result in additional charges.
