**Original Work Request:**

CMI has requested that we have pot feeders installed on the heating glycol loop. This needs to be done so contractor can add chemical to the system

**Description of Repairs Needed:**

Provide and install a 5 gal Neptune, boiler chemical pot feeder, Model DBH-5HP utilizing three 3/8 inch ball valves currently connected to the system. 1-3/8" valve is common to the suction side of the four pumps and the other two 3/8 ball valves are each individually connected to the paired two pumps. Install an individual PVC pot drain and exit at the floor drain with the boiler drains.
