| SPECIAL INSTRUCTIONS                       |                                                                                                                                                                                  |               |    |                                                                         |
| 1                                          | In addition to the procedure(s) outlined in this standard, the equipment manufacturer's recommended maintenance procedure(s) and/or instruction(s) shall be strictly adhered to. | ✓             |    |                                                                         |
| 2                                          | Schedule and coordinate work with operating personnel.                                                                                                                           | ✓             |    |                                                                         |
| 3                                          | Follow lock out/tag out procedures always. De-energize or discharge all hydraulic, electrical, mechanical, or thermal energy prior to beginning work.                            | ✓             |    |                                                                         |
| TO BE PERFORMED AT EACH INSPECTION SERVICE |                                                                                                                                                                                  |               |    |                                                                         |
| 1                                          | Open and tag switch.                                                                                                                                                             |               | ✓  | N/A                                                                     |
| 2                                          | Inspect visual condition of wiring. Look for evidence of overheating.                                                                                                            | ✓             |    |                                                                         |
| 3                                          | Check for proper light operation.                                                                                                                                                | ✓             |    |                                                                         |
| 4                                          | Test operation of automatic switches/ time clock/ photocells if applicable.                                                                                                      |               | ✓  | N/A                                                                     |
| 5                                          | Inspect light pole and mounting devices for deficiencies.                                                                                                                        | ✓             |    |                                                                         |

|   |                                                                                  |   |  |  |
|---|----------------------------------------------------------------------------------|---|--|--|
| 6 | For any noted deficiency, takes pictures and open corrective maintenance ticket. | ✓ |  |  |
|---|----------------------------------------------------------------------------------|---|--|--|

Note: The technician shall perform any repairs identified during PM up to \$250 (direct labor and direct material cost) per PM occurrence. For any deficiencies found exceeding \$250 open a corrective maintenance (CM) ticket and include the Asset #, WO #, photos, and a detailed description of the deficiency. To be performed by: General Maintenance Worker **Additional Notes:**
