U.S. CRANE WILL NOT PERFORM AN UNSAFE WEIGHT TEST

We reserve the right to cancel a scheduled weight test if any problem with the hoist or crane is observed which may be a safety hazard during a 125% lift. A visual inspection prior to the weight test is included to determine such problems. If such problems can be repaired by us before doing the test, we will require a purchase order for said repairs on a time and material basis. If you decided not to have the repairs completed at that time, the weight test will be cancelled and we will bill you only for the delivery and return of the weights, plus any lost time and equipment. Every effort will be made to complete the inspection as scheduled.

U.S. Crane, Inc. is not responsible for any damages incurred if such damage occurs as a result of the crane failing the test.
