DESCRIPTION OF PROBLEM:

One of the flag lights on site is burned out. This particular light is controlled by a photocell on an outdoor receptacle that is not GFCI and is missing its cover.

DESCRIPTION OF REPAIRS:

Moore's proposes to return to site. Recommend switching receptacle to a GFCI, installing an appropriate cover, and then converting the metal halides to LED. This will be a more cost efficient option for the customer than replacing with a 70W metal halide bulb/ballast kit.

Once completed with repairs, will test and ensure proper operation.

Items Not Included

- 1- Bond
- 2- Utility fees
- 3- Rock removal and offsite backfill
- 4- Responsibility for unsuitable soil
- 5- Roof openings, flashing and blocking
- 6- Cutting/Patching
- 7- Painting
- 8- Telephone, CATV, and Data wiring
- 9- Lintels required for HVAC openings
- 10- Sprinkler

If you have any questions about our proposal, or if we can be of any further assistance, please do not hesitate to call us.
